

# POWDER COATING MASKING TAPE

## PC400 GREEN TAPE 204°C

.05 film with .04mm green silicone adhesive. Ideal for **powder coating**. Withstands 204°C. Excellent tape when fine line definition is required. Removes easily, without leaving adhesive residue, from a wide variety of surfaces.

## KAPTON™ DISCS

Kapton Amber Discs are masking discs with silicone adhesive on a clear easy-release slit-back liner. High-temperature 260°C flame and chemical resistant film. Protects areas on circuit boards during wave soldering or protects parts during **powder coating** when temperatures reach 260°C.  
Amber in colour.
